

SWITCHBOARD SLOTTED TRUNKING

TECHNICAL INFORMATION

Superb quality ensures soft burr-free slots preventing cable damage even in high vibration situations.

True to size manufacturing means easy mounting and removal of cover despite a tight shake resistant fit.

Choosing the lobe version ensures the installed wires do not fall out.

The fingers have predetermined breaking points that are much more defined to allow easy break-out.

Additional breaking point in the floor of the trunking can be used even when the duct is already fixed in place.

This avoids loss of volume and speeds up installation. All sizes are Internal Dimensions.
