EMS-3 MARKING SYSTEM

TECHNICAL INFORMATION

CONTA-CLIP MARKING SYSTEM

Marking cables, connectors and devices to provide unmistakable, clearly arranged and permanently legible identification protects against mix-ups, increases safety and reduces work levels, which in turn reduces manufacturing and maintenance costs including those caused by production down-times.

CONTA-CLIP offer a wide variety of options for marking terminal blocks, cables, wires and devices.

CONTA-CLIP uses the EMS-3 Plotter manufactured in Germany and still the most cost effective way to mark products reliably.
