VENTGLAND SERIES

IP69K VENTGLAND SERIES - BREATHES & SEALS

VENTGLAND SYSTEM

The cable gland has a micro-porous, liquid-tight PTFE membrane that literally lets the casing breathe, which then compensates different pressures inside and outside the casing. Hence, condensation is reduced to a minimum while the high-tech membrane seals the VentGLAND in such a way that dirt and water can not penetrate into the inside of the casing. VentGLAND meets the high requirements of IP69K.

Your benefits from VentGLAND are that the cable gland and pressure compensation are in one device and that it reduces condensation to a minimum. There are great cost savings due to the following reasons: no extra components, no extra installation, no extra drilling.

IP69K VENTGLAND SETS

Product Code	Description	Size	Colour	Cable Ø	Thread Length	Price
ESVG20set	Ventgland with Locknut	M20	Black (RAL 9005)	6 - 13mm	10mm	\$33.54
ESVG25set	Ventgland with Locknut	M25	Black (RAL 9005)	9 - 17mm	10mm	\$45.57
ESVG32set	Ventgland with Locknut	M32	Black (RAL 9005)	13 - 21mm	12mm	\$63.87

EMC CABLE GLANDS

TECHNICAL INFORMATION

For Electromagnetic protection there is no better solution than what Wiska can offer. They have complete 360° connection of the cable shield with the lowest ohmic and inductive resistance of any gland system.

The EMC glands from Wiska are a high performance and safe solution that can be relied on in the harshest of environments.

IP68 EMC GLANDS WITH EARTHING CONE - NICKEL PLATED BRASS
